

Datasheet – Packaging Finishing Options

Spot UV coating and metallic foil blocking (in gold or silver)

CREATING ARTWORK

- Select finishing as a spot colour with the description „Scodix“
- All objects must have colour mode of 100% and should be set to „Overprint Fill“ not „Nonprinting“
- Place the finishing area on top of the printed area. (no CMYK area can be placed over it)
- No colour gradients, transparencies, colour grids, changes in opacity etc.
- No graphic effects (drop shadows, outer glows, gradients etc.)
- Spot colours cannot be used in the bleed
- **i This is not included in the superior artwork check**
- Distance of finishing coating to edge and crease lines = 3 mm (to ensure the finishing is not damaged by cutting or folding)
- **i This is not included in the superior artwork check**

LAYOUT REQUIREMENTS

- Font size must be at least 12 pt
- Font and lines must be at least 3 pt (1 mm) thick
- Positive lines (lines in spot colours) must be at least 3 pt (1 mm) thick
- Negative lines (area surrounding lines in spot colours) must be at least 6 pt (2 mm) thick

IMPORTING ARTWORK

- As a PDF (see print template)
- Artwork is subject to the general guidelines for PDF documents
